

These are examples of bike stands. They will be for sale by the Nordic Ski Association Jumping Club at the bib pickups...though they often sell out. They make a size for mountain bike tires as well as road bike tires. If the supply runs out before you can buy one, it would just take a few pieces of wood to make your own. Bikes may not be placed upside down in the transition areas.

You can also Google "triathlon bike stand" for online options; but try your luck with one of the Jumping Club stands.
